AGTI Value chain

The AGTI Team

The AGTI team is a blend of seasoned professionals and dynamic experts, with a strong focus on both technical gemology and business operations.

Advisory Board

The advisory board offers deep industry knowledge and strategic guidance, led by **Wodajeneh Ababe**, a pioneer in gold mining in Ethiopia. With over 45 years of research and mapping experience. And Cerci Simonnet a jewelry designing professional and gemologist with over 10 years of experience.

Technical Team

AGTI has internationally accredited team and Their qualifications include an M.Sc. in Geology and diplomas in both faceting and gemology.

Market Opportunity

Secondary target(International)

The ultimate opportunity lies in the global jewelry market, a vast industry valued at over \$367 billion and growing. Through our high-end brand, **Maereg Gems**, we will directly connect ethically sourced and traceable African gems to a discerning international clientele, capturing the full "mine-to-market" value.

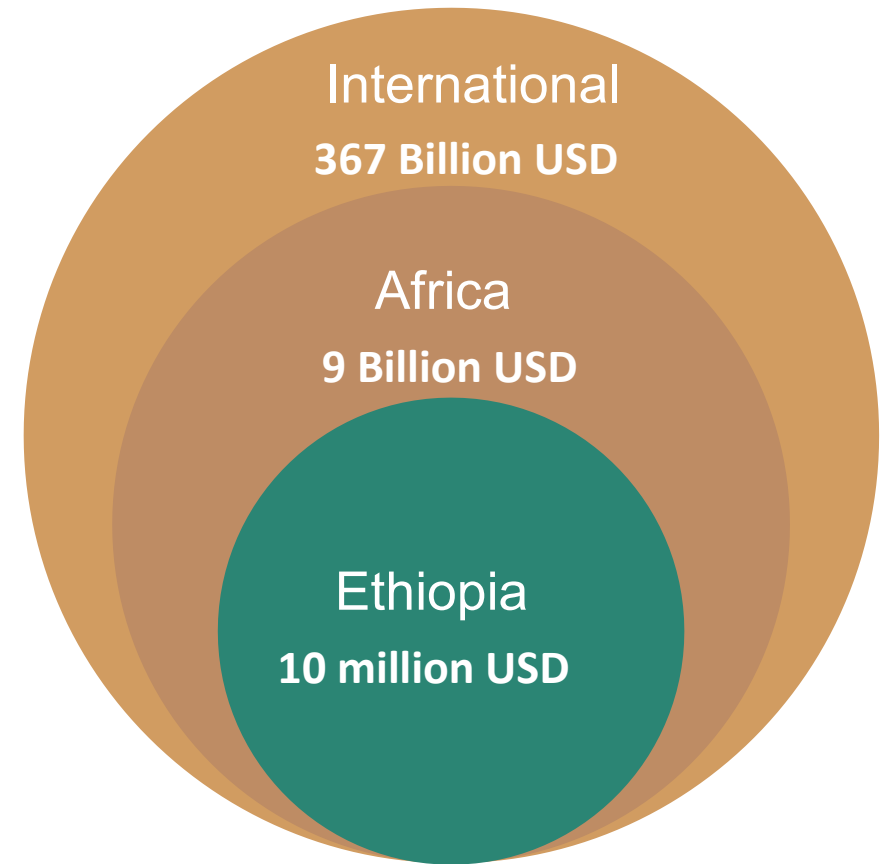

Main target(Africa)

Africa is the world's leading source of rough gemstones, a market valued at over \$7-billion. Yet, the continent exports over 85% of this value. AGTI's model can be replicated to help close this multi-billion-dollar value gap by empowering other African nations to process their own resources.

Core target(Ethiopia)

Ethiopia's gem sector is a multi-million dollar industry **10-12 million USD annually** poised for growth. By providing local, full-stack services—from education to cutting and certification—we enable local miners and traders to capture more value from their raw resources and formalize the domestic market.
